

SpeedyPack Movers

SpeedyPack Move Checklist

"Honesty, Experience, and Care in every box."

To ensure your transition is seamless and stress-free, we have compiled this essential timeline. Following these steps helps our crew work with maximum efficiency, saving you time and money.

Phase 1: 4–6 Weeks Before Moving Day

- **The Great Purge:** Go through every room (including the garage and attic). Donate or sell items you no longer need. Remember: Fewer items mean a faster, lower-cost move.
- **Document Hub:** Start a physical or digital folder for all moving-related paperwork, including your SpeedyPack estimate.
- **School & Medical Records:** Request copies of school transcripts and medical/dental records for all family members.
- **Change of Address:** Notify the post office, your bank, and your employer of your upcoming move.

Phase 2: 2–3 Weeks Before Moving Day

- **Utility Coordination:** Schedule your utilities (Hydro, Gas, Water, Internet) to be disconnected at your old home the day after you leave, and connected at the new home the day before you arrive.
- **Supplies Check:** If you are packing yourself, ensure you have professional-grade boxes and tape. (Contact us if you need a SpeedyPack supply delivery).
- **The "First Night" Box:** Pack a suitcase or clear bin with essentials: toiletries, a change of clothes, chargers, basic tools, and any medications.

Phase 3: 1 Week Before Moving Day

- Appliance Prep: Defrost your freezer and ensure appliances like washers and dryers are disconnected and drained.
- Floor Plan: Decide exactly where large furniture pieces will go in the new house. This allows our team to place them perfectly the first time.
- Valuables: Set aside jewelry, small heirlooms, and important legal documents. We recommend transporting these personally in your own vehicle.
- Phase 4: The Day Before (Tomorrow!)
- Clear the Path: Ensure walkways, driveways, and stairs are clear of debris (or snow/ice).
- Pack-Ready Check: Ensure all boxes are taped shut and labeled with the destination room.
- Electronics: Take photos of the back of your TV and computer setups so you know where the wires go, then pack them securely.
- Confirm Details: Double-check your arrival time window in your Moverbase quote link.

Moving Day Strategy

- Be Present: Ensure someone is available to answer questions for our movers or the crew.
- Final Walkthrough: Before the truck pulls away, check every closet and cupboard one last time.
- Safety First: Keep children and pets in a safe, quiet area away from the heavy lifting zones.
